

Products and Solutions

Launch – Monitor – Detect Issues Early

“
**Gain Complete
Vision into Your
Digital Systems**”

Many businesses all throughout the world rely on CrewMon as a performance monitoring platform. You can effortlessly configure your performance monitoring setup, start monitoring with a single click, and receive interactive reports in real-time.

Why to Adopt CrewMon in Your Business ?

- Easy monitoring configuration
- Low learning curve
- Enhanced user experience
- Free in-production crashes
- Boosted business operations
- Improved time to market
- Real time reporting
- Smart cloud infrastructure
- Business goals focus

Monitor All Aspects of Your Systems

- 1 Network and Infrastructure Monitoring
- 2 Application Performance Monitoring
- 3 APIs and Web Services Monitoring
- 4 Database Monitoring

More Than Monitoring

- Increase scalability levels
- Enhanced Productivity
- Maximize ROI
- Excellent customer experience
- Continuous Integration
- Low risk of revenue

Integrate your testing operations smoothly and deliver rapid/easy testing.

CrewCentric is a comprehensive test automation solution that TestCrew provides to the customers and introduces them to an easy path to execute test automation effectively, and rapidly.

Why is CrewCentric your Best Choice for Test Automation ?

- Hybrid Model
- Maintainability
- Usability
- Tests & Data Abstraction
- Low Learning Curve
- Cost Effective
- Continuous Integration
- Effective Collaboration
- Improved Agility

What Can CrewCentric Do for Your Business ?

- Easy Test Cases Flagging
- Reusable Objects Repository
- Wait Mechanism: Dynamic and Configurable
- Logger, Test, Report, Driver Listeners
- Parallel Execution To Speed Up Time
- Setup & Validation Methods for Web, API & Mobile Platforms

Your Business Will Gain More Than Automation:

- Enhanced Productivity
- Maximize ROI
- Faster Delivery
- Less Painful Regression

Cutting Edge Test Automation Solution for Your Business

Achieve a Competitive Edge for Your Digital Systems

Elevate Your Systems Performance with CrewFormance

Improved top and bottom line

Optimized cost and high ROI

Minimized Downtime

Revenue loss risk mitigation

Improved speed and reliability

Boost Your Digital Systems Performance and Achieve the Excellence

A high-performance system is essential to business success, and CrewFormance is key to your business performance engineering success. Based on industry benchmarks and best practices in software testing, CrewFormance is a unique solution that ensures your systems will run at their peak efficiency.

What Can CrewFormance Do for Your Business ?

Capacity Management

- Capacity Planning
- Cost Engineering
- Capacity Measurement

Performance Monitoring

- Production Performance Monitoring
- Staging Performance Monitoring

Performance Troubleshoot

- Performance Tuning
- Performance Analysis
- Performance Issue Reproduction

Reliable Engineering

- Fail-over verification
- Chaos Engineering

Performance Testing

- Performance Test Result Analysis & Reporting
- Performance Test Planning
- Performance Test Implementation
- Performance Test Design/Scripting

Load Testing Made Simple
for Everyone

CrewLoad is a Platform-Based Performance Testing solution trusted by thousands of companies around the globe. You can set up your performance testing easily, start testing with one click and get instant reports interactively.

CrewLoad – New Path of Performance Excellence

- Improved time to market
- Enhanced user experience
- Boosted business operations
- Free in-production crashes
- Smart cloud infrastructure
- Real time reporting
- Easy load testing configuration
- No code needed
- Low learning curve

What CrewLoad Brings to Your Business?

API services Testing

Ensure your APIs scale up under large number of requests. Mobile, web app, game, IOT, smart car, whatever the type of end point is, you can trust CrewLoad.

Web App Testing

Test your website and know the limits where it fails, to prevent crashes at critical times. Load test your solution instantly and get direct results.

Customizable real time reporting

Create custom reports visualizations easily, compare load results over time and create report templates in just few clicks.

Simulate heavy traffic

Using CrewLoad, you can simulate up to millions of virtual people navigating on your app, which helps you analyze your application's performance precisely and identify its bottlenecks.

Boost Your Digital Systems Performance and Achieve The Excellence

Bridging the Gap in Software Testing

QA360 team has the ability to design customized testing solutions for each project they work on. This allows them to work in a domain-driven approach, which can help their customers achieve business goals easily. By making quality a priority and part of the work culture, the QA360 team can help set new paths to business growth for their customers.

Why to Hire QA360 ?

Make software quality a priority and part of your culture.

Decreased testing effort and delivery time.

Enhanced relationship between the customers and the management.

Set a goal for 100% on-time delivery KPI.

What can QA360 do ?

- Performance Testing
- Compatibility Testing
- QA Process Consulting
- Software Testing Management
- Save Organization Time
- Test Data Creation Models
- Automated Testing
- Load Testing
- Manual Testing
- Security Testing
- Functional Testing
- Quality Assurance

What QA360 Brings to Your Business ?

Improved software quality

Increased customer satisfaction

Optimized cost and high ROI

Improved security

Reduced time to market

Early identification of defects

Data breach detection

Minimized Downtime
